Profile

Software Engineer, specializing in Java backend development. I am proficient in various frameworks such as Spring and Hibernate and have experience in building microservices and RESTful APIs. I have worked with databases such as PostgreSQL, Redis and MongoDB. Also have strong knowledge on Android SDK. Able to self-manage effectively during independent projects, as well as collaborate as part of a productive team. Eager to learn new skills, that can help me with the job. I enjoy solving complex problems and finding innovative solutions to improve the efficiency and effectiveness of software systems.
